

SCG Hockey Plus Program

Smoothness. Stability. Durability. Cushion. Turf water retention. Quick surface drainage.

These are the characteristics of a championship-caliber field hockey pitch. They provide fast ball roll, precise ball control, safe footing and minimal rain delays.

The undisputed expert in building such fields is Sports Construction Group (SCG). The SCG team's credentials include:

- 20+ years experience in constructing high-performance athletic fields
- More than one-quarter of all 80 NCAA Division I field hockey programs are on the SCG client roster
- Current sponsor of USA Field Hockey

SCG's field hockey pitch construction services include:

- Design
- Drainage
- Engineering
- Irrigation
- Base construction
- Turf installation

Additionally, SCG provides value-added services including annual inspections and testing for FIH standards.

Plus, we give you peace of mind with the exclusive SCG 8x8 Insured Warranty, which covers both the sub base and synthetic turf for eight years.

Now an official distributor of Shaw Sportex synthetic turf, SCG offers the winning combination of construction services and turf systems to give every team a championship-quality field hockey pitch.

SCG is the Go-To Team for Field Hockey Pitch Construction

Since 2004, 36 NCAA Division I field hockey programs have constructed new pitches. More than 60% chose SCG. They include:

- American
- Colgate
- Connecticut
- Cornell
- Dartmouth
- Delaware
- Duke
- Kent State
- Lehigh
- Liberty University
- Lock Haven
- Longwood
- Maryland
- Miami (Ohio)
- Middlebury College
- Monmouth
- North Carolina
- Northwestern
- Ohio State
- Old Dominion
- Penn State
- Rutgers
- Temple
- Washington and Lee University
- William & Mary

In addition, hundreds of NCAA Division II and III programs, as well as high schools have turned to SCG to construct their field systems.

"I was so impressed by the quality of work shown by the Sports Construction guys. Their meticulous nature was impressive and it showed when we started training on the surface. After games, coaches and players commented on how well the field played."

– Liz Tchou

SCG Hockey Plus Program
SCG Field Hockey Synthetic Turf Systems

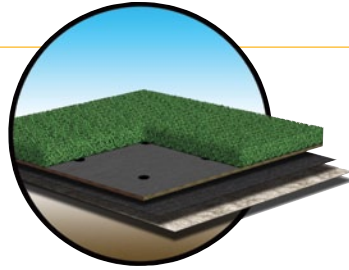

SCG Field Hockey Synthetic Turf Systems

When it comes to field hockey turf, nobody has you covered better than the combined team of Sports Construction Group and Shaw Sportexe. Our lineup includes synthetic turf systems for every level of play and budget. All are FIH approved.

"I'm raving about the field – and there are many things to rave about. The sub base, the padding, the draining system, wow!

– Char Morett
Penn State University
Head Field Hockey Coach

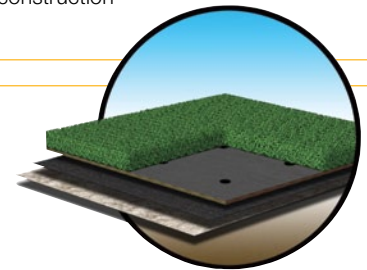

HockeyTurf Elite

Woven Nylon Turf System

HockeyTurf Elite is the first innovation in hockey turf in more than a decade! Developed specifically for field hockey, the nylon turf system is manufactured via a

sophisticated weaving process. Only Shaw Sportexe has the vast R&D and manufacturing depth to bring a woven nylon turf like HockeyTurf Elite to market. Benefits include:

- **TRUE BALL ROLL** – this dense turf has a smoother top surface that is more pool-table-like than any other turf available
- **DIMENSIONAL STABILITY** – the face fibers are interlaced with the backing to create one stable layer
- **LOW SLIDE RESISTANCE** – the turf holds moisture better and longer, which improves play and requires less watering
- **QUICK DRAINAGE** – the backing is inherently porous, which allows the field to drain quickly and completely, when combined with an expertly constructed drainage system
- **ENDURANCE** – the woven construction provides durability that extends the turf system's lifecycle and is proven to outperform any other carpet construction

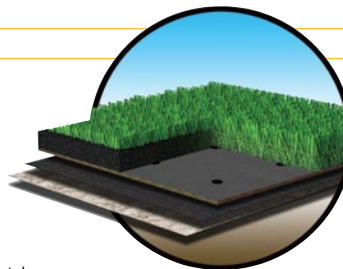

HockeyGrass Club

Tufted Nylon Turf System

HockeyGrass Club is a field-hockey-specific turf system made from texturized nylon with a tufted construction. Its characteristics include:

- **SMOOTH AND STABLE SURFACE** – provides a smooth and fast surface while offering dimensional stability and predictable ball roll
- **CONTAINS WATER** – designed to preserve moisture without excessive watering
- **DURABILITY** – made from texturized nylon fibers, which are more durable than polyethylene or polypropylene
- **HIGH VALUE** – as a tufted system, it combines proven performance with good value as compared to a knitted turf
- **PAD OPTIONS** – whether for a stone or asphalt base, various pad options are available

VictoryTurf

Hybrid Turf System

VictoryTurf is a dual fiber synthetic turf system designed to provide balanced performance for multiple sports. Indoors or outdoors, VictoryTurf is the ideal surface for multi-sport use. Among its benefits are:

- **HYBRID CONSTRUCTION** – balance between grass-like and carpet-like play for any sport, including football, soccer, baseball, field hockey and lacrosse
- **GOOD BALL ROLL** – with a minimum 1" fiber installed over the pad, VictoryTurf allows for a high level of ball roll
- **CUSHIONING** – installed over an elastic layer, prefabricated rubber or foam shock pad to cushion athletes during play
- **FIBER OPTIONS** – offered in XP or monofilament fiber configurations
- **REDUCED FLY-OUT** – the nylon SpikeZone helps trap the infill to prevent fly-out and resist compaction

"My players love the new field and this facility is one of the best I've ever seen."

– Pat Rudy
Lock Haven University
Head Field Hockey Coach

"Working with one company to manage the entire project was ideal – and cost efficient. They started on time, the job was completed on time and the company was great to work with."

– Marv Bevan
Penn State University
Project Manager of Design and Construction
